99.02 DEFINITIONS. For use in this chapter, the following terms are defined:

1. "BOD" (denoting Biological Oxygen Demand) means the quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure in five (5) days at twenty degrees (20°) C, expressed in milligrams per liter or parts per million.
2. "COD" (denoting Chemical Oxygen Demand) means the amount of the oxidant consumed is experimentally measured to calculate the equivalent amount of oxygen required by the wastewater for the degradation of the pollutants.
3. City of Nevada Industrial and Commercial Pretreatment Manual This manual sets forth uniform requirements for Users of the Publicly Owned Treatment Works for the City of Nevada [the City] and enables the City to comply with all applicable State and Federal laws, including the Clean Water Act (33 United States Code [U.S.C.] section 1251 et seq.) and the General Pretreatment Regulations (Title 40 of the Code of Federal Regulations [CFR] Part 403).
4. "Service Charges" are for debt retirement of any existing or future bonded indebtedness which include a minimum monthly charge and a usage charge per 1000 gallon.
5. "Normal domestic wastewater" means wastewater that has a BOD₅ concentration of not more than 200 mg/l, a total suspended solids concentration of not more than 200 mg/l and an ammonia nitrogen concentration of not more than 35 mg/l.
6. "Operation and maintenance" mean all expenditures during the useful life of the wastewater treatment works for materials, labor, utilities and other items which are necessary for managing and maintaining the sewage works to achieve the capacity and performance for which such works were designed and constructed.
7. "Penalty Charge" means those charges assessed a major contributing industry when violations of a Participant's Capacity per the NPDES Permit through the City's permit are billed. These are in addition to any surcharges that have been assessed.

12. "TKN" means the Total Kjeldahl Nitrogen is the sum of the organic nitrogen and ammonia nitrogen. concentration expressed in mg/l as determined using EPA approved methods.

13. "Total Nitrogen (TN)" The sum of the TKN, Nitrate and Nitrite in the sample using EPA approved methods.

14. "Total Phosphorous (TP)" total phosphorus is the sum of all the forms of phosphorus in the sample: orthophosphate, condensed phosphate, and organic phosphate using EPA approved methods.

15. "Total Suspended Solids (TSS)" A well-mixed sample is filtered through a weighed standard glass-fiber filter and the residue retained on the filter is dried to a constant weight at 103 to 105°C. The increase in weight of the filter represents the total suspended solids using EPA approved methods.

16. "Treatment works" means any devices and systems used for the storage, treatment, recycling and reclamation of municipal sewage, domestic sewage or liquid industrial wastes. These include intercepting sewers, outfall sewers, sewage collection systems, individual systems, pumping, power and other equipment and their appurtenances; extensions, improvement, remodeling, additions and alterations thereof; elements essential to provide a reliable recycled supply such as standby treatment units and clear well facilities; and any works, including site acquisition of the land, that will be an integral part of the treatment process or used for ultimate disposal of residues resulting from such treatment (including land used for composting sludge, temporary storage of such compost, and land used for the storage of treated wastewater in land treatment systems before land application); or any other method or system for preventing, abating, reducing, storing, treating, separating or disposing of municipal waste or industrial waste, including waste in combined storm water and sanitary sewer systems.

17. "Useful life" means the estimated period during which a treatment works will be operated.

18. "User charge" means that portion of the total wastewater service charge which is levied in a proportional and adequate manner for the cost of operation, maintenance and replacement of the treatment works.

The user charge system shall generate adequate annual revenues to pay costs of annual operation and maintenance including replacement and costs associated with debt retirement of bonded capital associated with financing the treatment works which the City may by ordinance designate to be paid by the user charge system. That portion of the total user charge which is designated for operation and maintenance including repair, expansion or replacement of the collection system, pumping stations and treatment works shall be established by this chapter.

99.04 WATER METERS. Each user shall pay for the services provided by the City based on said user's use of the treatment works as determined by water meters acceptable to the City, and as further defined in Chapter 90 through 92 of this Code of Ordinances.

99.05 CHARGES BASED ON USAGE. For residential contributors, monthly user charges will be based on actual water usage for that month as evidenced by meter readings. For industrial and commercial contributors, user charges shall be based on water used during the current month. If a commercial or industrial contributor has a consumptive use of water, or in some other manner uses water at the contributor's expense, and in a manner acceptable to the City.

99.06 DOMESTIC, COMMERCIAL AND INDUSTRIAL CLASSIFICATION SYSTEM. The City of Nevada evaluates sewer use charges for domestic, commercial and industrial dischargers based on a flow charge that includes the treatment of: Flow, BOD, COD, TSS, TKN, Total Nitrogen, Total Phosphorous, Oil/Grease and any other requirements based on the City's NPDES permit. The universal flow-based rate is applied to all dischargers. Additional surcharges for excessive discharges of the conventional pollutants listed above are applied through the City's NPDES Treatment Agreements, sewer discharge monitoring and the Commercial-Industrial Classification

System. Sewer use charges will address the discharges as to the type of discharge and with uniform surcharge rates for monitored industrial dischargers. Classifications will be: Residential: Single family domestic sewage discharger; Commercial; Industrial; Industrial-Monitored.

99.07 CLASSIFICATION DEFINITIONS. The universal flow-based rate is applied to all dischargers to the City of Nevada Wastewater Treatment Facility. Additional surcharges for excessive discharges of the conventional pollutants listed are applied through the City's NPDES Treatment Agreements, sewer discharge monitoring and the Commercial-Industrial Classification System

2. Industrial-Monitored: An industrial discharger that:

A. Monitors and records the flow from their discharge to the sanitary sewer with a Flow Paced or Time Paced Sampler and pH Recording Sampler five (5) days a week.

B. Determines the concentration of the following conventional pollutants utilizing the approved methods in 40 CFR part 136 and under the requirements of the Sufficiently Sensitive Method requirements in 40 CFR part 122.44. However, the total deposit shall not exceed an amount that is equal to three months' average use based on past usage during the most recent period of continuous occupancy. In these cases, a "Notices of Additional Deposit" shall be mailed by ordinary U.S. mail to the customer. In addition to notifying the customer that they must remit the additional deposit and the reason for its requirement, the Notice shall also state that if the additional deposit is not paid within 30 days from the date of the Notice, sewer service may be disconnected pursuant to the same procedures in section 92.06 of this Code. The charge to each such user shall be as determined by the responsible plant operating personnel and approved by the Council.

99.14 UTILITY BILL ADJUSTMENT POLICY. To establish a consistent framework for adjustments to the wastewater portion on a customer's utility bill that is reasonable and bill caused by a leak on the customer's side of the meter or increased usage due to reasons listed in the Utility Bill Adjustment Policy. Customer's may submit a Utility Adjustment Request Form and required documents to the City Administrator's office for consideration.

The City shall review the user charge system at least annually in accordance with the Financial Policy of the City and revise user charge rates as necessary to ensure that the system generates adequate revenues to pay the costs of operation and maintenance including replacement and any debt retirement of any existing or future bonded indebtedness and that the system

continues to provide for the proportional distribution of operation and maintenance including replacement costs among users and user classes.

99.18 NOTICE TO USERS. The City will notify each user at least annually, in conjunction with a regular bill, of the rate being charged for operation and maintenance including replacement of the treatment works.

99.19 USER CHARGE ORDINANCE. The user charge ordinance shall take precedence over any terms or conditions of agreements or contracts which are inconsistent with the requirements of Section 204(b)(1)(A) of the Federal Clean Water Act and 40 CFR Part 35.2140 per current edition.
